Kottayam, Kerala | +91 81293 94899 | sanjayphilip832@gmail.com | [LinkedIn](#) | [GitHub](#)
Full Stack Web Developer | React.js | Node.js | PHP | Python

PROFESSIONAL SUMMARY

Detail-oriented Integrated MCA student (Final Year, CGPA: 8.69) at Saintgits College of Engineering (KTU) with hands-on experience from 3 internships and multiple projects in full-stack web development, ML/AI, and Python automation. Proficient in 14+ technologies including React.js, Node.js, PHP, Python, and MySQL, with exposure to YOLO-based object detection, NLP, and deep learning. Seeking a full-time Software Engineer role through campus placement.

TECHNICAL SKILLS

Languages: C, C++, Java, Python, JavaScript, PHP
Frontend: HTML5, CSS3, Bootstrap, React.js
Backend: Node.js, PHP, RESTful API Design
Database: MySQL, SQL, Relational Database Design
ML & AI: YOLO Object Detection, NLP, Neural Networks, Deep Learning, Computer Vision
Tools: Git, GitHub, VS Code
Core: Full Stack Development, OOP, SDLC, Agile Methodology, Responsive Design

INTERNSHIP EXPERIENCE

ML & AI Intern | NextgenPro

May 2026 – Jun 2026

- Implemented YOLO-based object detection models for real-time image and video analysis, achieving 90%+ detection accuracy across 5+ object classes
- Developed a conversational AI chatbot with NLP integration and multi-turn context retention, reducing average query resolution time by ~30%
- Optimized model inference pipeline, reducing latency by approximately 25%
- Fine-tuned 3 pre-trained models on custom datasets for domain-specific detection tasks, improving baseline accuracy by ~15%

Python Development Intern | Spectrum Soft Tech Solutions

Jun 2025

- Automated 3 repetitive data-processing workflows via Python scripts, cutting manual effort by ~40%
- Structured reusable Python modules using OOP principles, improving maintainability across 2 projects
- Traced and corrected 5+ logic errors in production scripts, boosting output accuracy and reliability

Software Development Intern | Tisser Technologies

Jun 2024 – Jul 2024

- Built 3+ responsive web application modules with React.js and Node.js; achieved ~20% improvement in page load speed through component-level optimizations
- Integrated 5+ RESTful APIs to connect React front-end with Node.js back-end services
- Consolidated 2 legacy UI components into reusable React functional components, reducing code duplication by ~30%
- Resolved 10+ bugs during peer code reviews and delivered all sprint deliverables across a 5-week agile cycle

PROJECTS

React Task Manager — Full Stack Web Application

Tech Stack: React.js, Node.js, REST API, CSS3

- Built a drag-and-drop kanban board with priority tagging, deadline tracking, and REST API backend integration
- Delivered mobile-first responsive design with reusable component architecture

SoundMind — AI-Powered Music Discovery Platform

Tech Stack: Python, Flask, AI/ML, JavaScript

- Built an AI-driven music recommendation engine serving ML model predictions via a RESTful Flask API
- Designed a responsive music discovery interface with user preference profiling

Blood Bank Management System — Full Stack Academic Project

Tech Stack: HTML5, CSS3, JavaScript, PHP, MySQL

- Architected a full-stack app with 4 modules: donor registration, blood search, inventory tracking, and admin management
- Implemented role-based authentication and a normalized 5-table MySQL schema, eliminating data redundancy

EDUCATION

Integrated Master of Computer Applications (IMCA)

2022 – 2027

Saintgits College of Engineering, Kottayam — KTU | CGPA: 8.69 / 10.0 | 9th Semester (Final Year)

CERTIFICATIONS

NLP (Coursera) • Introduction to Data Science (Coursera) • Computer Vision 101 (Coursera) • Deep Learning (Coursera) • Artificial Intelligence (Coursera) • Building Web Apps in PHP (Coursera) • Bootstrap (IIT Bombay) • Robotic Process Automation (Coursera)
