

# SANJAY PHILIP

Full Stack Web Developer | React.js | Node.js | PHP | Python | MLOps  
Kottayam, Kerala | +91 8129394899 | sanjayphilip832@gmail.com | linkedin.com/in/sanjayphilip

---

## PROFESSIONAL SUMMARY

Detail-oriented Integrated M.C.A. student (Final Year, CGPA: 8.69) at Saintgits College of Engineering (KTU) with hands-on experience from 3 internships and 6+ projects in full-stack web development, ML/AI deployment, and Python automation. Proficient in 15+ technologies including React.js, Node.js, PHP, Python, and MySQL, with expertise in YOLO-based object detection, NLP, deep learning, and MLOps pipelines. Seeking a full-time Software Engineer role through campus placement.

---

## TECHNICAL SKILLS

**Languages:** C, C++, Java, Python, JavaScript, PHP

**Frontend:** HTML5, CSS3, Bootstrap, React.js, TypeScript

**Backend:** Node.js, Flask, FastAPI, PHP, RESTful API Design

**Database:** MySQL, MongoDB, SQLAlchemy, SQL, Relational Database Design

**ML & AI:** YOLO Object Detection, NLP, Neural Networks, Deep Learning, Computer Vision, OpenCV, OpenAI Whisper

**DevOps & Tools:** Git, GitHub, Docker, GitHub Actions, Vercel, Railway, Render, VS Code

**Core:** Full Stack Development, OOP, SDLC, Agile Methodology, MLOps, Responsive Design

---

## INTERNSHIP EXPERIENCE

**ML & AI Intern** | NextgenPro

May 2026 – Jun 2026

- Implemented YOLO-based object detection models for real-time image and video analysis, achieving 90%+ detection accuracy across 5+ object classes.
- Developed a conversational AI chatbot with NLP integration and multi-turn context retention, reducing average query resolution time by ~30%.
- Optimized model inference pipeline, reducing latency by approximately 25%; fine-tuned 3 pre-trained models on custom datasets, improving baseline accuracy.

**Python Development Intern** | Spectrum Soft Tech Solutions

Jun 2025

- Automated 3 repetitive data-processing workflows via Python scripts, cutting manual effort by ~40%.
- Structured reusable Python modules using OOP principles, improving maintainability across 2 projects.
- Traced and corrected 5+ logic errors in production scripts, boosting output accuracy.

**Software Development Intern** | Tisser Technologies

Jun 2024 – Jul 2024

- Built 3+ responsive web application modules with React.js and Node.js; achieved ~20% improvement in page load speed through component-level optimizations.
- Integrated 5+ RESTful APIs to connect React front-end with Node.js back-end services.
- Consolidated 2 legacy UI components into reusable React functional components, reducing code duplication by ~30%.
- Resolved 10+ bugs during peer code reviews and delivered all sprint deliverables across a 5-week agile sprint.

---

## PROJECTS

**Smart Attendance System** | Full Stack Web Application | [github.com/SanjayPhilip](https://github.com/SanjayPhilip)

Tech Stack: React, Flask, OpenCV, SQLAlchemy, Vercel, Railway

- Built a facial recognition-based attendance marking system with real-time analytics dashboards and cloud deployment on Vercel and Railway.
- Designed a full-stack architecture integrating React front-end, Flask REST API, and SQLAlchemy ORM with automated deployment.

#### **MLOps Pipeline** | ML Engineering Project | [github.com/SanjayPhilip](https://github.com/SanjayPhilip)

Tech Stack: Python, FastAPI, Docker, GitHub Actions, Render

- Engineered an end-to-end MLOps pipeline to train, track, containerize, and deploy ML models via FastAPI REST API.
- Implemented automated CI/CD on Render using GitHub Actions, reducing manual deployment effort.

#### **AI Video Subtitle Generator** | AI-Powered Web Application | [github.com/SanjayPhilip](https://github.com/SanjayPhilip)

Tech Stack: TypeScript, React, OpenAI Whisper, Node.js

- Developed an AI-powered subtitle generation tool that auto-transcribes video/audio to synchronized SRT/VTB subtitles using OpenAI Whisper.
- Delivered a responsive glassmorphism UI in React/TypeScript with Node.js backend.

#### **React Task Manager** | Full Stack Web Application | [github.com/SanjayPhilip](https://github.com/SanjayPhilip)

Tech Stack: React.js, Node.js, MongoDB, REST API, CSS3

- Built a drag-and-drop kanban board with priority tagging, deadline tracking, and REST API backend.
- Delivered mobile-first responsive design with reusable components.

#### **E Blood Connect** | Full Stack Academic Project | [github.com/SanjayPhilip](https://github.com/SanjayPhilip)

Tech Stack: PHP, MySQL, HTML5, CSS3, JavaScript

- Architected a full-stack blood donation management system with 4 modules: donor registration, blood search, inventory tracking, and admin management.
- Implemented role-based authentication and a normalized MySQL schema with automatic blood-type compatibility matching.

## **EDUCATION**

---

### **Integrated Master of Computer Applications (I.M.C.A.)**

Saintgits College of Engineering, Kottayam — KTU | CGPA: 8.69/10.0 | 2022 – 2027 (Final Year, 9th Semester)

## **CERTIFICATIONS**

---

NLP (Coursera) • Deep Learning (Coursera) • Computer Vision 101 (Coursera) • Artificial Intelligence (Coursera) • Introduction to Data Science (Coursera) • Building Web Apps in PHP (Coursera) • Bootstrap (IIT Bombay) • Robotic Process Automation (Coursera)
