Full Stack Web Developer | Software Engineer | React.js | Node.js | PHP

PROFESSIONAL SUMMARY

Detail-oriented Integrated MCA student (9th Semester, CGPA: 8.69) at Saintgits College of Engineering, KTU, with hands-on experience from 2 internships and an independent full-stack project. Proficient in 14+ technologies spanning front-end, back-end, and database domains — including React.js, Node.js, PHP, Python, MySQL, and Bootstrap. Demonstrated ability to build responsive web applications, connect RESTful APIs, and automate repetitive workflows. Comfortable in agile team environments and committed to writing clean, maintainable code. Seeking a full-time software engineer role through campus placement.

EDUCATION

Integrated Master of Computer Applications (IMCA) 2021 – 2026

Saintgits College of Engineering, Pathamuttom, Kottayam — APJ Abdul Kalam Technological University (KTU)
CGPA: 8.69 / 10.0 | 9th Semester (Final Year)

TECHNICAL SKILLS

Programming Languages: C, C++, Java, Python, JavaScript, PHP

Frontend Development: HTML5, CSS3, Bootstrap, React.js

Backend Development: Node.js, PHP, RESTful API Design

Database: MySQL, SQL, Relational Database Design

Tools & Platforms: Git, Git Bash, GitHub, VS Code

Core Competencies: Full Stack Development, OOP, SDLC, Agile Methodology, Responsive Design

INTERNSHIP EXPERIENCE

Software Development Intern | Tisser Technologies Jun 2024 – Jul 2024

- Built 3+ responsive web application modules with React.js and Node.js, achieving an estimated 20% improvement in page load speed through component-level optimizations
- Integrated 5+ RESTful APIs to establish seamless communication between the React front-end and Node.js back-end services
- Consolidated 2 legacy UI components into reusable React functional components, cutting code duplication by approximately 30%
- Identified and resolved 10+ bugs during peer code reviews, strengthening overall code quality and long-term maintainability
- Completed all sprint deliverables on schedule across a 5-week agile cycle, consistently meeting team milestones

Python Development Intern | Spectrum Soft Tech Solutions Jun 2025

- Automated 3 repetitive data-processing workflows via Python scripts, cutting manual effort by roughly 40%
- Structured reusable Python modules following object-oriented programming (OOP) principles, improving maintainability across 2 internal projects
- Traced and corrected 5+ logic errors in production scripts, boosting output accuracy and overall system reliability

PROJECTS

Blood Bank Management System | Full Stack Academic Project

Tech Stack: HTML5, CSS3, JavaScript, PHP, MySQL

- Architected a full-stack web application with 4 functional modules: donor registration, blood group search, inventory tracking, and admin management
- Implemented role-based authentication to enforce access control across 2 user levels — admin and general user
- Constructed a normalized 5-table MySQL schema, eliminating data redundancy and optimizing query execution
- Ensured cross-device compatibility across mobile, tablet, and desktop by applying responsive CSS and JavaScript techniques
- Handled all real-time CRUD operations through a PHP back-end, enabling instant updates to blood stock records

CERTIFICATIONS & TRAINING

- **Bootstrap** — Spoken Tutorial Project, IIT Bombay
- **Natural Language Processing (NLP)** — Coursera
- **Introduction to Data Science** — Coursera
- **Building Web Applications in PHP** — Coursera

KEY STRENGTHS

Full Stack Development • Problem Solving • Team Collaboration • Agile Methodology • Code Review • Attention to Detail • Time Management • Written & Verbal Communication

LANGUAGES

English (Professional) • Malayalam (Native) • Hindi (Conversational)

DECLARATION

I hereby declare that the information provided above is true and accurate to the best of my knowledge.
